

## ***NEW DRUG CANDIDATES***

New Drug Candidates with annual index is published monthly except for August by the Pharma Forum Institute, Inc.

The Journal provides recent progress in new drug candidates and related R & D topics. Most candidates and related topics are published and submitted recently from Japan and worldwide. The sources include the recent major Japanese journals, congresses, and symposia and also those worldwide. The Journal also provides the most recent findings useful for designing new screening systems and for new mode of action. The information will also give indispensable clues for new drug alertness, licensing access, R&D joint project, and industry news. Review articles of recent topics are also published a few times annually including anticancer candidates.

The editorial office is located at the Pharma Forum Institute, Inc., Japan. The chief editor, Keiji Nakamura, Ph. D. experienced presidents of domestic and international congresses and symposia related to hypertension and international pharmaceutical licensing symposium (IPLS), and is in charge of the Japan Pharmaceutical Licensing Association (JPLA), Tokyo. Monthly meeting for the JPLA is held every third Wednesday (except for August) at Imperial University Club in Tokyo to get together with 100-150 delegates each time (for details, see <http://www.pharma-fi.com/index.html>)
